

PRODUCT PORTFOLIO

MICROFLEX 

The most trusted name in gloves

## TOP-OF-THE-LINE PROTECTION, BOTTOM LINE PRODUCTIVITY

At Microflex we've been actively advancing safety and protection for over a quarter century. As the most trusted name in gloves we engineer, manufacture and deliver a diverse collection of innovative, best-in-class disposable gloves for a wide array of industries. We go beyond superior protection, pushing the boundaries of disposable glove performance and productivity. The result is a broad portfolio of purpose-built disposable gloves that help to boost your bottom line.

### Best-in-class products

We provide a highly diversified portfolio of hand protection solutions that outperform the competition, often exceeding standards across the industries we serve. We are proud to welcome High Five brands to our offering.

### Most advanced capabilities

From breakthrough R&D and industry-leading manufacturing technologies to a highly efficient inventory management system, we employ a complete 360-degree approach that ensures the utmost control over quality.

### Greater business impact

We are driving industry innovation and optimizing productivity for businesses by engineering the combination of superior protection, improved comfort and enhanced performance into our product solutions.

## THE COST OF WORK INJURIES IS GETTING OUT OF HAND

From skin irritation and allergic reactions, to hand fatigue and carpal tunnel syndrome, the results of ill-fitting or poorly made gloves can be devastating for workers and employers alike. Uncomfortable gloves can make it more difficult to complete the task at hand which can lead to reduced productivity and costly hand injuries.

**\$156.2 BILLION\***  
*Amount work injuries cost Americans*

**70%\*\***  
*Percentage of work-related hand injuries that could be prevented by workers wearing gloves*

**>\$500 MILLION†**  
*Cost from hand injuries alone to U.S. employers*

**ONE MILLION‡**  
*Number of emergency room visits per year that could be prevented by simply wearing protective gloves*

\*National Safety Council

†Bureau of Labor Statistics Work Injury Reports

‡Centers for Disease Control and Prevention

## PURPOSE-BUILT TO OUTPERFORM

At Microflex, our commitment to breakthrough innovation and scientific advancement has led us to continually evolve our product line to help users overcome the challenges associated with wearing disposable gloves. The result is a collection of purpose-built disposable gloves that provide superior protection, promote complete hand health and help to optimize profitability.

4

## BEST IN CLASS PRODUCTS

Developing best-in-class hand protection begins with our unyielding focus on users – what they do, how they do it and how we can help them do it better. Our knowledge of the user enables us to purpose-build our gloves to meet the specific needs for each of our customers based upon task, application and environment.

### A Focus on Hand Health

Microflex gloves are designed to promote overall hand health, helping to mitigate annoying skin irritation and allergies and increase user compliance.

### Breakthrough Technology and Design

Employing advanced material formulations while enhancing ergonomics allows our gloves to provide superior protection while actively increasing productivity and performance.

### Task-Specific Engineering

By incorporating proprietary features into the design of our gloves, we have created a diversified portfolio of products specifically engineered for the task at hand.

**THE XCEED® EFFECT:  
A FITTING EXAMPLE OF USER-FOCUSED INNOVATION**

Our efforts to reduce hand fatigue and the occupational risks associated with wearing protective gloves, such as carpal tunnel syndrome, led to the development of our groundbreaking XCEED® product.

**Greater Strength**

*Creation of a breakthrough nitrile formulation that delivers superior glove strength from a lighter, thinner material*

**Greater Performance**

*Ability to outperform bare-hand manipulation and significantly reduce muscle effort*

**Greater Protection**

*Pinhole rates nearly 75% lower than the FDA's stringent standards*

**Designed for Comfort**

*First exam glove to be certified by U.S. ergonomics*

## SUPERIOR QUALITY, ALL THE WAY AROUND

At Microflex, the key to our success as the most trusted name in gloves has been maintaining complete control over the manufacturing of our gloves from start to finish. From the design of the product, to how it reaches the customer's door, our 360-degree process leverages our advanced capabilities to ensure we continue to provide the industry's leading quality and improve your bottom line.

### Research & Development

Developing advanced innovations to increase barrier protection standards and improve worker ergonomics

### User Testing

Ensuring our products help users overcome common daily challenges

## MOST ADVANCED CAPABILITIES

### Global Supply Chain Optimization

Driving efficiencies in inventory management and supply utilization to further reduce expense costs

### On-Site Quality Control

Ongoing auditing and review of our manufacturing processes

## Environmental Design

Reducing packaging, energy and waste to positively impact our environment and your profit

### SAFETY MEETS SUSTAINABILITY

At Microflex we take our position as the industry leader seriously and consider it our responsibility to help advance our industry's approach to sustainability. From the use of sustainable elements and recyclable materials to more efficient value packaging, we are dedicated in our efforts to conserve and protect the earth we all share.

#### Value Engineering

*Reducing the amount of materials, energy and fuel used in our building, shipping and storing of products*

#### Use of Soy-Based Inks

*Employing sustainable, natural resources in our designs*

#### 100% Recyclable Packaging

*Reducing our overall carbon footprint*

## REACHING A HIGHER STANDARD OF EXCELLENCE

The cornerstone to our long-standing status as the quality leader among hand protection providers is our rigorous Microflex Quality System, bringing industry-leading processes and professionals together to provide the utmost safety and satisfaction to our valued customers. This commitment is reflected in our varied industry certifications.

**CERTIFIED  
ISO 13485**

#### ISO 13485

*Microflex brands are ISO 13485 certified, ensuring that our product requirements reach beyond the normal quality system standards employed by our competitors.*

#### ASTM International & FDA

*Our examination gloves meet or exceed all current and proposed standards imposed by the ASTM International and the Food and Drug Administration (FDA). Our entire hand protection portfolio complies with FDA Food Contact Regulations (21CFR177.2600).*

#### C-TPAT

*As a voluntary member of the Customs-Trade Partnership Against Terrorism, Microflex is doing our part to strengthen supply chain and border security, adhering to their stringent requirements for manufacturing and distribution.*

## AN OPTIMIZED HAND PROTECTION PROGRAM END TO END

With Microflex, your business gets the absolute most out of its hand protection investment, improving the use of gloves and related protective equipment in your environment, while reducing the total expense associated with these supplies. Our experts address the critical logistical and behavioral areas that impact how personal protective equipment is both purchased and employed. Then, we help you design the right program, putting the controls in place to ensure that it is being used correctly and waste is eliminated from the process.

### GREATER **BUSINESS IMPACT**

The result is a complete approach that delivers:

#### **Better Product Selection and SKU Management**

Ensuring you have the right gloves for both your workplace and job requirements

#### **Better Cost Performance**

Driving a lower total cost of utilization, not just a lower price

#### **Better Overall Supply Management**

Optimizing how your organization purchases, stores, dispenses and reorders its disposable gloves
